操作说明

Operation instructions

只有软件版本 V15.2.0 及以上的版本才支持升级语言包。

Only software versions V15.2.0 and above support upgrading language packs.

操作说明	1
Operation instructions	1
1.检查语言包版本与软件版本是否匹配。	2
Check if the language pack version matches the software version	2
2.修改语言包。	3
Modify Language Pack	3
3.生成语言升级包。	3
Generate language upgrade package	3
4.升级语言包。	4
Ungrade the language pack	4

1.检查语言包版本与软件版本是否匹配。

Check if the language pack version matches the software version.

在喷码机软件版本里查看语言包版本(V108005):

View the language pack version in the software version of the inkjet printer (V108005):

查看下载的语言包版本(V108005):

View downloaded language pack versions (V108005):

如果版本不匹配,请从以下链接下载合适的版本。我们会及时上传更新后的每个版本。 If the versions do not match, please download the appropriate version from the following link.We will upload updated versions in a timely manner.

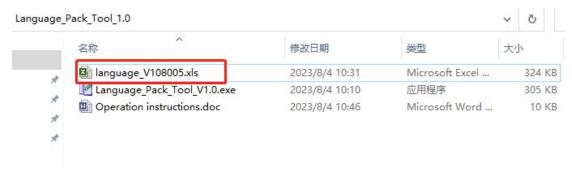

https://github.com/dykxjh/language-pack https://gitee.com/inkprinter/language-pack

2.修改语言包。

Modify Language Pack.

打开语言包文件"language V108005.xls",修改不正确的地方,保存并退出。

Open the language pack file 'language_V108005. xls', modify any incorrect areas, save and exit.

3.生成语言升级包。

Generate language upgrade package.

打开语言包工具 "Language_Pack_Tool_V1.0.exe"。

Open the language pack tool 'Language Pack Tool V1.0. exe'.

选择修改后的语言包文件。

Select the modified language pack file.

点击"Creat Update File"按钮,然后会生成语言升级包。

Click on the "Create Update File" button, and a language upgrade package will be generated.

Generated language upgrade package

4.升级语言包。

Upgrade the language pack.

复制"language_pack_V108005.bin"到 U 盘,然后插到喷码机上,点击检查更新即可升级。

Copy 'language_pack_V108005. bin' to a USB disk, then insert it into the inkjet printer, click on 'Check for updates' to upgrade.
